MEDICINES GOVERNANCE

SECAmb clinicians can now access more than 40 PGDs via the easy-to-use JRCALC Plus App. The app allows clinicians to seamlessly move between current SECAmb PGDs and JRCALC medicines guidance on their individual-issue iPAD, whilst at the patient's side.

Key features of the app:

- Digital signature of PGDs – including the requirement for staff to complete a PGD competency assessment before use
- Authorisation by staff level – the app recognises different clinical grades of staff, so only the right staff can sign PGDs
- Rapid access to reports – without the use of paper, the digital system enables all data to be easily accessed, allowing analysis to inform training and identify trends
